#### No Press and Shock!

If pressure to LCD, orientation may be disturbed.  
LCD will broken by shock!

#### Don't Swallow or Touch Liquid Crystal!

Liquid Crystal may be leaked when display is broken.  
If it accidentally gets your hands, wash then with water!

#### Don't not Scratch!

Polarizer is a soft material and can easily be scratched.

#### No DC Voltage to LCD!

DC voltage or driving higher than the specified voltage will reduce the lifetime of the LCD.

### Don't Press the Metallic Frame and Disassemble the LCM

Pressure on the metallic frame and PCB may deform the conductive rubber or break the liquid crystal cell and back light, which will cause defects.

LCD may be shifted or conductive rubber may be reshaped, which will cause defects.

### Slowly Peel Off Protective Film!

Avoid static electricity.

### Avoid Static Electricity!

Please be sure to ground human body and electric appliances during work. It is preferable to use conductive mat on table and wear cotton clothes or conduction processed fiber. Synthetic fiber is not recommended.

### Wear Gloves While Handling!

It is preferable to wear gloves to avoid damaging the LCD.

Please do not touch electrodes with bare hands or make them dirty.

### Keep Away From Extreme Heat and Humidity!

LCD deteriorates.

### Use Alcohol to Clean Terminals!

When attaching with the heat seal or anisotropically conductive film, wipe off with alcohol before use.

## Don't Drop Water on LCD!

Note that the presence of waterdrops or dew in the LCD panel may deteriorate the polarizer or corrode electrode.

## Precaution in Soldering LCD Module

Basic instructions: Solder I/O terminals only.

Use soldering iron without leakage.

(1) Soldering condition to I/O terminals

Temperature at tip of the iron:  $280 \pm 10^\circ\text{C}$

Soldering time: 3~4 sec.

Type of solder: Eutectic solder (containing colophony-flux)

\*Please do not use flux because it may soak into LCD Module or contaminate it.

\*It is preferable to peel off protective film on display surface after soldering I/O terminals is finished.

(2) Remove connector or cable

\*When you remove connector or cable soldered to I/O terminals, please confirm that solder is fully melted. If you remove by force, electrodes at I/O terminals may be damaged (or stripped off).

\*It is recommended to use solder suction machine.

## Long-term Storage

If it is necessary to store LCD modules for a long time, please comply with the following procedures.

If storage condition is not satisfactory, display (especially polarizer) may be deteriorated or soldering I/O terminals may become difficult (some oxide is generated at I/O terminals plating).

1. Store as delivered by Optrex

2. If you store as unpacked, put in anti-static bag, seal its opening and store where it is not subjected to direct sunshine nor fluorescent lamp.

3. Store at temperature 0 to  $+35^\circ\text{C}$  and at low humidity. Please refer to our specification sheets for storage temperature range and humidity condition.

## Long-term Storage

Please use power supply with built-in surge protection circuit.
